

Decanter era

VITAJUWEL

The decanter era marks a milestone in the process of preparing gemwater. Elegant and timeless design meets state-of-the-art usability.

Before you start using your decanter era, please remove the clip (A) from the lid (B) by lightly pressing on it from below and thoroughly rinse all the parts by hand with a mild detergent or in the dishwasher. As the lid has an opening, you can easily refill the closed Decanter era by simply pouring into the lid.

- 1** Insert your VitaJuwel Gemstone Vial (C) from below in the opening of the lid (B).
- 2** Close the accompanying clip (A) around the neck of the vial and screw the clip into the lid.
- 3** Gently insert the vial with the lid into the opening of the Decanter era (D).
- 4** Close the Decanter era with light pressure.

For taking the vial out of the decanter, carefully grasp the decanter at the top with both hands and push up the lid slowly using your thumbs. Make sure the vial doesn't hit the side of the decanter.

We'd love to help you choose the perfect VitaJuwel Gemstone Vial. Simply contact us anytime!
